

Evaluation of School Board

The Board believes that continuous evaluation is essential to exemplary public service stewardship and organizational excellence. As an integral component of the district leadership system, the board is committed to evaluate its capacity for providing sustainable leadership based on the Malcolm Baldrige Education Criteria for Performance Excellence. The Board uses the evaluation process to advance its development and improve both its personal leadership effectiveness and that of the board and leadership system.

The evaluation process should be conducted annually and include stakeholder feedback. The evaluation should include a discussion of strengths as well as opportunities for improvement of the Board's operational procedures and adherence to the Baldrige Education Criteria for Performance Excellence.
