Guide for parents who think their child may have symptoms of bipolar disorder, or parents whose child has been diagnosed with the illness.

Covers the range of topics parents need to know in order to help their children, such as: diagnosis and common misdiagnoses, family life, support, safety and how to recognize and prevent mood swings, medications, therapeutic interventions, insurance issues, and education, including how to work with school systems.

Consumer text discusses how to distinguish between early warning signs of bipolar mood swings and normal ups and downs of life, what medications are available, what to do when symptoms arise, how to get help and support from family and friends, and how to tell coworkers about the illness without endangering a career

This book helps parents: understand why bipolar disorder is often overlooked or misdiagnosed, distinguish bipolarity from other common childhood disorders like ADHD, explain why their child may be well behaved in school but out of control at home, communicate effectively with their child and learn about the latest treatment options available.

This book is intended to make everyone aware of how Bipolar Disorder, otherwise known as Manic Depressive Illness, especially in its atypical forms, is presently misunderstood and misdiagnosed as ADHD, Conduct Disorder, and other related behavioral disorders.

Delivers practical way to manage chaos and relieve stress so everyone in the family can find stability, support, and peace of mind.
