

## Ritenour School District

### **What is your current status? (these questions have been adapted from the Missouri State Literacy Plan)**

#### ***What structures are in place in our schools/district for us to share responsibility for student literacy, numeracy, and social emotional achievement? (see Tiered Model template)***

The Ritenour School District and Special School District relationship is characterized by a strong collaborative partnership. The districts work together to establish structures for shared responsibility of student achievement in the areas of literacy, numeracy, and social emotional learning. The tiered structures in grades K-12 for each area outlined below demonstrate a continuum of curricula, supports, and targeted intervention aimed at reaching the unique needs of each student in the district. Further, the following elements also contribute to the collaborative work being done within the district in sharing responsibility for student achievement:

- Collaborative Care Team and Student Support Team processes for Tiers 2 and 3 involve general education staff, special education staff, and school psychologists
- Ritenour district level RTI committee includes general education, special education and general education leaders and special education
- Weekly Sped Coordinator/Principal meetings focused on student achievement, staffing, professional development and discipline
- General and special education representation on a variety of building level committees, including Building Leadership Teams and Area Leadership Teams
- Support from SSD EPS and facilitators for building level professional development and coaching
- Special education staff involvement in Ritenour professional development opportunities and initiatives
- Elementary buildings use an Inclusion Focused Model to improve collaboration with general education staff and provide opportunities for special education staff to support delivery of classroom instruction
- Collaboration with Curriculum and Instruction to develop processes for transition to Competency Based Learning structure
- Ritenour building planning begins with district initiatives and SSD works toward meeting those initiatives while also meeting individual student needs, at likely lower levels or Tier 3 and with support at Tier 1 & 2, according to the RTI process.

***How do building/district leaders support literacy, numeracy, and social emotional instruction across the curriculum and for all students?***

District leaders work with educators to develop the outlined tiers of student support found below. Special Education Coordinators and Principals work together to communicate and monitor high expectations of all staff and students, provide time for development and learning for staff members, seek collaboration time for educators, budget and align resources to support initiatives in literacy, numeracy, and social emotional instruction, and provide time for teachers to analyze assessment data and collaborate on adjustments to student support and intervention. Specific examples of district leaders providing support in literacy, numeracy and social emotional instruction include the following:

- Providing targeted, ongoing professional development and coaching aligned with literacy, numeracy, and social emotional goals of the district
- Engaging with stakeholders through curriculum review committees and ALT program reviews to ensure instruction is targeted, effective, aligned with standards, and developed around evidence-based practices.
- Ensuring professional development is based upon current research and best practice in the areas of literacy, numeracy, social emotional instruction
- Offering targeted observation and support to staff in implementation of programs/interventions and instructional practices in literacy, numeracy, social emotional instruction
- Working continually with district leaders through a continuous improvement model to determine the instructional needs of the school by reviewing student data, district goals, instructional practice strengths and areas of improvement, and learning about the needs of the staff
- Providing time and leading discussions about instructional practices and their impact on student learning. Administrators are present during the analysis of data in data and department/grade level meetings (SSD/general education) to ensure that teachers are using assessment data to inform instruction and examine student performance.

***What supports are in place to sustain evidence-based practices in literacy, numeracy, and social emotional development?***

Evidence-based practices are sustained by the development of comprehensive district PD plans and building PD plans with follow up coaching and support from general education and SSD facilitators, instructional coaches, and assessment coaches. Additionally, each building in the district has a teacher-level instructional specialist who is available to support both general and special education staff.

In the data teams process staff utilize various resources from the SSD Data Teams' site in order to ensure evidence-based practices are discussed and utilized in developing plans of support for students. Further, evidence-based practices are a focus during general education and special education teacher evaluations.

***How does our school/district provide support for all teachers to ensure professional growth in literacy, numeracy, and social emotional development?***

Ritenour and SSD work together to provide support for all teachers through the following methods:

- Ongoing professional development and coaching
- Building, department, and grade level collaboration time is embedded within schedules to allow general and special education teachers to reflect on practices, analyze assessment data, and make necessary instructional adjustments.
- Opportunities for teachers to attend outside trainings (general and special education needs) to support their professional growth in literacy, numeracy and social emotional instruction

***How do we ensure our written/taught/learned curriculum is aligned to the Missouri Learning Standards expectations?***

Ritenour and SSD work together to provide support for all teachers through the following methods:

Ensuring the curriculum is aligned to Missouri Learning Standards is an inherent part of the curriculum writing process and is conducted in coordination with the Curriculum and Instruction Department for the district. The district utilizes EMBARC

Ritenour and SSD work together to develop Competency Based Learning structures

***What collaborative structures do we have in place to ensure Missouri Learning Standards expectations are the foundation of the written curriculum?***

In Ritenour, SSD is a part of the process to make decisions regarding curriculum. As mentioned above, there is a curriculum writing and review process established in the district. Teachers are involved in department curriculum reviews and revisions and Special Education Coordinators work with the Assistant Superintendent and Curriculum Facilitators.

***What are our processes to write, review, revise and adopt curriculum? How is special education included in this process?***

In Ritenour, special education teachers are included in the writing, review, revision, and adoption of instructional resources to implement the curriculum.

***How do we ensure instruction within the comprehensive literacy, numeracy and social emotional curriculum meets the needs of each student?***

Ensuring our instruction is meeting the needs of students in the district is driven by a data-informed approach. The following structures support this work:

- Continued monitoring of Fast Bridge Benchmark Data and State Performance Data across the district
- Monitoring student progression on state standards through CBL

- Continued monitoring of formative and summative assessment data and Fast Bridge progress monitoring assessment data at the building levels through the following:
  - Grade level meetings
  - Department team meetings
  - Student Support Team meetings at the building level
  - Individual student problem solving meetings
  - SSD data team meetings
  - SEB case review meetings

***How do we select quality resources and provide teachers with the training to implement them effectively? How are Special education teachers included in this process?***

The District Curriculum Committee has an established a rigorous process to review and select quality programs and resources. SSD programs and resources are selected by Area Leadership Teams, utilizing the guidance provided by the SSD Research-Based Practices Selection Framework. The framework and additional intervention selection tools provided by SSD guide selection of programs and strategies. Special education teachers participate in grade-level professional development provided by Ritenour. Special education teachers are also provided necessary training in instructional practices and programs to be implemented through PD opportunities and on-site coaching as applicable provided by SSD. EPS staff and instructional coaches help support follow-up coaching to ensure resources are implemented with fidelity.

***How have we developed an effective and coherent assessment system in our classrooms/buildings/district?***

Administrators and educators in the district have been informed of the role and function of the assessment system. Staff have been provided training on the delivery and interpretation of scores/information for district assessments and the development of skills specific to interpretation of the data toward instructional modification.

A district assessment schedule has been developed and disseminated to all staff. The RTI committee, which includes special education staff, has identified assessments for progress monitoring as well as benchmarking have been identified and teachers understand the role assessment plays in their instruction, as well as at the building screening level.

As the district transitions to a CBL model, the standards progressions have been developed and shared with special education staff. All staff are being trained on the use of Empower to promote collaboration in assessing proficiency and identify instructional areas needing remediation.

***How do we use ongoing classroom formative and summative assessments, district benchmarks and state-required assessments?***

Formative and summative assessments are utilized to provide direction to individual teacher staff at the micro level for individual student needs and classroom instructional adjustment, utilizing Continuous Classroom Improvement (CCI) practices. Data from formative and summative assessment are also reviewed and used to guide instructional decisions in grade level and department team meetings. These assessments, which include benchmark assessment and progress monitoring, also contribute to guiding decision-making in student IEP programming decisions. A comprehensive bank of benchmark and progress monitoring assessment data is maintained and utilized to guide decision making in students' movement through structural tiers in the building student support meetings, problem solving meetings, and data team meetings at the building level.

At the district level benchmark data and state-required assessment data are analyzed to guide strategic planning for the district in meeting the identified goals around literacy, numeracy, and social emotional learning and establishing priority areas.

***How do we determine which assessments to use in our classrooms/ buildings/district?***

Formative and summative assessments are teacher-driven and aligned to instructional units and lessons. Students are assessed regularly throughout the instructional cycles by grade level and department teams to determine progress toward standards. The District Assessment Plan is reviewed annually, through an assessment audit process. Adjustments are made, as needed, with a focus on identifying assessments that are useful, timely, minimize impact on instructional time, and provide the intended information required.

***How do we help all educators become assessment literate?***

Teachers are provided training on the purpose, implementation, and interpretation of results for the assessments utilized by the district. The Curriculum and Instruction department provides professional development to general education and special education teachers. In addition, SSD also has assessment coaches who will provide support to a group or individually. The establishment of Fast Bridge Super-Users in each building ensures a staff member can support colleagues in benchmarking and progress monitoring in both numeracy and literacy. Each SSD Data Team has an identified Data Team Leader, who supports teachers in utilizing and interpreting data to make instructional decisions. These leaders participate in SSD Data Leader Cohorts to ensure they are current on the most recent guidance from the district in the effective use of assessment.

***How do our programs and practices engage families/partners in literacy, numeracy, and social emotional development?***

As part of the CSIP process in Ritenour, family representatives are included in strategic district planning for all areas including literacy, numeracy, and social emotional learning. Family collaboration and partnerships are sought through the Student Support Team, evaluation, and IEP process. Connections are also fostered with PEDAs administrators and to the Family Resource Center at SSD by promotion from SSD administrators and teacher-level staff.

## Definitions:

**Reading/Literacy Tier One:** Core should include: Academic language (vocabulary; inferencing; narrative language); Phonemic Awareness (K-2 until mastered); Phonics; (including advanced phonics); Sight Words; reading connective text (accuracy, fluency, comprehension); Comprehension skills should include activating prior knowledge, predicting, questioning, clarifying or questioning and monitoring; inferencing; retelling and summarizing; identifying and using organizational text structure and encoding of how language works. Assessments: universal screenings to see who may be at risk and monitor progress on grade level -differentiated instruction based on results; benchmarking suggested at least 3 times per year.

**Reading/Literacy Tier Two:** Provide intensive, systematic instruction on **up to three foundational reading skills** in small groups to students who score below the benchmark on universal screening. Typically, these groups meet between three and five times a week for 20–40 minutes. Should be very focused on explicit instruction of foundational skills  
Assessment: progress monitor at least monthly to determine progress and need

**Reading/Literacy Tier Three:** Provide **intensive instruction daily that promotes the development of various components of reading proficiency to students** who show minimal progress after reasonable time in tier 2 small group instruction (**increase frequency or intensity from tier 2**)

Assessment: progress monitor weekly

## Reading/Literacy/Writing

### Goal:

Grade:	Priority Standards	Tier One (Universals/Core)	Tier Two (Intervention)	Tier Three (Remediation)
K	1) Vocabulary with Assistance: Develop an understanding of vocabulary.	<b>Setting:</b> Classroom  <b>Resources:</b> Making Meaning-Comprehension Being a Reader	<b>Setting:</b> Small group, 1:1 classroom teacher  <b>Resources:</b>	<b>Setting:</b> Small group, 1:1  <b>Resources:</b> Ladders to Literacy, Road to the Code, LLI, SIPPS, PALS,

## Definitions:

**Social Emotional Tier One:** Core should include four elements: Sequenced: connected and coordinated activities to foster skills development; Active: active forms of learning to help students master new skills and attitudes; Focused: component that emphasizes developing personal and social skills; Explicit: targeting specific social and emotional skills. Assessments: universal screenings to see who may be at risk and monitor progress-differentiated instruction based on results; benchmarking suggested at least 3 times per year.

**Social Emotional Tier Two:** Provide intensive, explicit, systematic instruction in small groups to students who score below the benchmark on universal screening. Typically, these groups meet between three and five times a week for 20–40 minutes Should be very focused on explicit instruction of foundational social skills  
Assessment: progress monitor at least monthly to determine progress and need

**Social Emotional Tier Three:** Provide **intensive instruction daily that promotes the development of various components of social skills competencies to students** who show minimal progress after reasonable time in tier 2 small group instruction (**increase frequency or intensity from tier 2**)

Assessment: progress monitor weekly

## Social Emotional:
